

12D Biology Work for Friday 9th Feb 2024

This is a good chance to revise everything we have covered so far in the 'Transport in Animals' unit of study.

I have set a variety of Seneca tasks for you to complete (I can see your progress as you do it).

This should take about 60 minutes and includes some relevant exam-style questions.

Either use the link below, or log in via RM Unify and look for the assignment I've set for you.
