

## **Year 11 Design and Technology**

### **Manufacture Diary**

Please login to your NEA and complete your manufacture diary. This is a step-by-step record of the steps you have taken so far to manufacture your project in the workshop. Include the correct technical terms for any tools, equipment, and processes that you have used.

You should also take the opportunity to check through Sections A to D of your coursework, to ensure that all sections are completed to the best of your ability.

Any questions, please email me,
